New Capabilities/Enhancements

Support for Advanced Network Devices (AND) IP speakers with digital clocks

- ◆ Displays text in scrolling format
- ◆ 911 alerts can be sent to these devices by location
- ◆ Supports multicast and broadcast
- ◆ One IPsession license per device

Support for digital signage via Cisco Digital Media Player

- ◆ Cisco DMP 4400G support
- ◆ Can display messages, 911 alerts, paging text and mass messaging
- ◆ Can be mapped to a particular location
- ◆ One IPsession license per device; can register with multiple IPsessions

911 color alerting and off-premise alerting

- ◆ Alerts can cause the display to change to a solid color, with or without an audible tone—a very effective silent alert
- ◆ Administrator can select priority, audible tone and alert color
- ◆ 911 alerts can now utilize the Dial-Out capability embedded in IPsession to sent alerts to phones that are off-premise.
